Limited*

CONSULTANT:

A. Baldassarra Architect

CONTRACT TYPE:

Firm Price

DURATION OF PROJECT:

5 Months

PROJECT SIZE:

21,396 sq. ft.

This entire addition was a quick deep freezer for Backerhaus bakery, which proved to be challenging in meeting the mechanical requirements regarding the artisan bread business.

This project started at the end of November which resulted in many weather related challenges including soft subgrade, difficulty finishing the parking area and keeping Backerhaus' existing operation and access open during construction. Many meetings were needed to keep everyone co-ordinated, however, with everyone's co-operation the project was completed with minimal disruption.
