

PRIME DESIGN BUILD
CORPORATION

Where the Building Begins.

SRT Pedestrian Bridge and Entrance Connection Toronto, Ontario

CLIENT:

Equinox Condominium Ltd.

CONSULTANTS:

E.I. Richmond Architects Ltd.

CONTRACT TYPE:

Firm Price

DURATION OF PROJECT:

12 Months

PROJECT SIZE:

2,200 sq. ft.

This unique project involved a lot of co-ordination and co-operation between the owners of both sides of the bridge. Much of the work was completed at night to avoid interference with bus traffic from the TTC transit station at the Scarborough Town Centre. On the other side of the bridge work had to be done to an existing condominium structure to prepare for the bridge and build the ramp and stair.
