

PRIME DESIGN BUILD
CORPORATION

Where the Building Begins.

Zion Alliance Church

Markham, Ontario

CLIENT:

Zion Alliance Church

CONSULTANT:

Weston Consulting

CONTRACT TYPE:

Construction Management

DURATION OF PROJECT:

6 months

PROJECT SIZE:

3,500 sq. ft.

This building is an addition to the existing church which was originally built in 1899.

Located next to Beaver Creek, and sandwiched between 2 cemeteries, this project provided some unique challenges which Prime, it's Subcontractors and Consultants skillfully navigated including building with approval from the burial and bereavement authority. Dealing with a high water table being next to the Toronto Conservation land and ensuring the site was inspected and passed by an archaeologist prior to excavating for construction.
